Circular Elegance

PEOPLE LIGHT OUR WAY

GIRO

Elegant, innovative, perfect.

With striking elegance, the **GIRO** circular luminaire integrates flawlessly into the clear and simple design language of Regent and amazes with its endless, uninterrupted illuminated circle.

High-quality bent aluminium, precisely processed down to the last detail, forms an impressive frame and support design. The diffuser, made from a round extruded profile, not only produces an uninterrupted, uninterrupted light pattern, but is also manufactured in a particularly resource-efficient way.

Innovative technology

In order to maximise efficiency in the smallest possible space, we have developed a bendable control gear that fits perfectly into the curve of the luminaire.

Elegance in one piece

The 360° round diffuser drawn in one piece makes it possible to achieve the elegance of uninterrupted light in a resource-saving way.

Perfect diversity

The **GIRO** circular luminaire is available in sizes 750, 1200 and 1500 mm and in the colours black, white, silver, raw brushed aluminium or highly polished aluminium. The Tunable White light colour and housing versions in a colour of your choice are also available for projects.
